THRU: William L. Burnam, Chief
Toxicology Branch/HED (TS-769C)

WLB 11/02/84

Meeting with Mr. LaRocca, two members of Residue Chemistry Branch, and two representatives from the Nor-Am Chemical Company and myself took place in Mr. LaRocca's office, 10/31/84.

After some discussion it was apparent that in-put from Toxicology Branch was not necessary at this point in time. Problems in analytical procedure will have to be resolved with RCB before Toxicology Branch can address any problems related to the toxicity testing of the compound Dioxathion.
